

AMMONIUM SULPHATE CRYSTALLINE

Page 1 / 1
Page 1 / 1

TECHNICAL PARAMETERS

Previous edition: 2013

1. Product name: Ammonium Sulphate (NH₄)₂SO₄

Origin: Russia

• Appearance	white to light yellowish crystals
• Nitrogen mass fraction as dry substance, %, not less	21
• Mass fraction of Sulphur, %, not less	24
• Mass fraction of water, % not more	0.3
• Free sulphuric acid, mass fraction, % not more than	0.05
• Water insolubles, %	0.02
• Free flowing, free from any foreign matters/ Friability, %	100

Quality of Ammonium Sulphate shall comply with these technical specifications and related to TU-113-03-10-1891.

Ammonium Sulphate (NH₄)₂SO₄ Minimum content of nitrogen in terms of ammonia 21% and sulphur (in terms of sulphur) 24% (form 21N-0-0-24S)

The product is manufactured according to ISO 9001 and ISO 14001
